QUICK INTRO

Follow these simple steps to get started with your new Smart Vape:

1 Charge your Vape

Plug in your Vape.

A charging icon will appear.
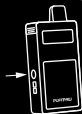

2 Prepare the Pod

Insert the heating core into the pod.

Wait **5** minutes for optimal flavor.

Use the pod within **7** days after inserting the heating core.

Heating Core

3 Turn On the Vape

Press the power button for 5 seconds.

The screen will turn on.

Follow the on-screen instructions.

④ Insert the Pod
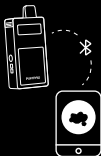

Align the pod.

Insert until it fits seamlessly.

A verification logo will appear for genuine pods.

If it doesn't, rotate the pod and try again.

⑤ Start Vaping

Simply inhale at the mouthpiece.

⑥ App Pairing

Open the Puffpaw app.

Connect your device to the Puffpaw app as instructed.

*Each Puffpaw pod provides approximately 1000 puffs of effective usage. This number is based on results obtained in a controlled lab environment. Actual puff count may vary depending on individual usage habits.

⚠ Please remove the pod from the device when not in use, especially before boarding an airplane.
